

Grant Assistance for Grass-Roots Human Security Projects
Handing Over Ceremony of
‘The Project for Construction of Classroom Building for Arnon Atomea Primary School’

On 3rd October, 2019, a Handing Over Ceremony for ‘The Project for Construction of Classroom Building for Arnon Atomea Primary School’ was held at North Malaita District in Malaita Province. The ceremony was attended by head teacher, teachers, students and the representatives.

The Government of Japan supported the community through grant assistance amounting to US\$90,897 (SBD\$695,362) to construct a new permanent classroom building (single story with 4 classrooms and library).

Head teacher said in his remarks that he appreciated Japan’s heartfelt support and promised to maintain the new building well so that many children surrounding the areas will be able to benefit.

Their school enrollment has been rapidly increasing because the number of current births at the school catchment area is about 30 every month. Therefore, they will be able to accept more students by this project.
