

Grant Assistance for Grass-Roots Human Security Projects
Handing Over Ceremony of
‘The Project for Construction of Classroom Building and Staff House for Kopiu Primary School’

On 22nd September, 2020, a Handing Over Ceremony for ‘The Project for Construction of Classroom Building and Staff House for Kopiu Primary School’ was held in Weather Coast District of Guadalcanal Province. The ceremony was attended by approximately 400 people including school representatives.

The Government of Japan supported Kopiu Primary School, which had lost their classroom building and staff house from cyclone, through grant assistance amounting to US\$66,997 (SBD\$542,675) to rebuild a raised-floor classroom building (3 classrooms) and staff house (3 rooms). The project is expected to solve the shortage of school facilities and improve the learning environment by providing single-grade classroom to all grades.

The head teacher said in her remarks, ‘We won’t have any problems with our school facilities again. We would like to say thank you to the government of Japan and the tax payers.’
